

DigiFoil 33

LABELGRAFF
Digital Labeling & Packaging

**MADE IN
JAPAN**

Foil without Die

Foil material sticks to the tonner base, therefore the die or plate like stamping process is not required. Both big image and details image are possible to be foiled. Multiple colors foil are available.

Compact Body

Table top type and power supply is only 100V. Paper size is A5 ~ A3 Possible to adjust the temperature and speed depending on work.

New method Dry Coating

Clear material is transferred onto the whole paper, and make gloss effect. Very thin material and unnecessary to be-trimmed the paper after process. Liner is also unnecessary. No curl problem.

Eco Friendly

Coating is not required type, therefore the maintenance is easy and no smell problem. Also the coated material is not film, therefore possible to recycle as papers.
