

DIGIFOIL 330U

One single unit performs 3 different jobs!!
Image Coating / Color Foiling
Make it possible to Laminate

- ◆ 3 types process are possible by one machine
- ◆ Air suction feeding, so less damage for image
- ◆ Laminating film can be cut by automatically
- ◆ Underfilm is not required for lamination

TOUCH PANEL

All buttons are by Pictgram, so easy to understand. Just push the film type on the panel, then control the suitable temperature for the film by automatically.

AIR VOLUME ADJUSTMENT

Air volume is possible to be adjust on Touch Panel.

AIR SUCTION FEEDING

Smoothly feeding is possible by air suction feeding.

The paper is fed from the top. Possible to adjust the strength of paper separation by separation rubbers.

Less damage mechanism for the papers.

Compared with the previous model, DC-XII, the paper feeding has become more stable.

IMPROVED PERFORMANCE

Further improvement of foil processing quality compared to the previous model, Digifoil 33.

LAMINATING FILM CUT

Laminating film is cut completely by Flying Knife.

Film width is possible to be cut depending on the paper size by Edge Cutter.

MULTIPUL PROCESS BY ONE MACHINE!!

1 Image Coating
*Spot Gloss

2 Foiling
Gold/Silver/Hologram...

3 Laminating
Auto Cutting function (Flying knife)

LINE-UP

DIGIFOIL 33

SPECIFICATIONS

Coating Type	Color Foil/Image cast/Laminate
Paper Size	Min : 210 x 148 mm Max: 330 x 660 mm
Paper thickness	110~400 gsm /t=0.12~0.46mm conditional
Speed	~3.2 m/min (adjustable)
Feeding	Air suction belt with auto elevator system
Temp.adjust	90-160° C
Power	AC 100V 50/60 Hz. 700W
Dimension	1100 x 580 x 450mm *as miminum setting
