Sourcing specific worded or shaped labels can often be time consuming and costly. This is where the CPM-100SH allows you to effect huge cost savings and operational improvements. No more minimum order quantities, just print what you want when you want it!

## Why purchase a CPM-100SH?

The CPM-100SH delivers hi-definition print at twice the speed of our other CPM models. Optimised for use on our speciality and polyester product range. The 600dpi print head provides crisp edge-line definition to text and graphics, ideal when small output is required. This opens up a range of applications, these include:

- Product Labels
- Cryogenic, Laboratory and Test-tube Labels
- Warranty Labels
- PCB Labels (Printed Circuit Board)
- Barcode Labels
- Schematics and Technical Graphics

In addition, this model covers all the established uses for the CPM, such as:

- Health & Safety Signs
- Engineering Labelling
- Electrical Marking
- Plant ID
- Asset Labelling
- Tamper Evident Labels

## How does the CPM-100SH work?

The CPM-100SH combines thermal print and vinyl-cutting technology, together with our tried and tested software, to produce both multiple spot, or full colour outputs. So for example, you can design and print a multi-coloured label that can then be contour-cut to fit into a recess. Because the system handles individual shapes and sizes, there's no need to buy customised blank labels. For customers who need to label high-value, low quantity equipment in a professional manner, the CPM-100SH is ideal.

With a print length of up to 1.5 metres at a time, you could print and cut more than 100 product labels 50mm x 24mm in one go.

## Included Software

Our innovative Microsoft Certified software enables you to incorporate sequential numbering, information from databases and even barcodes. With a comprehensive clip art gallery containing more than 3,800 symbols, all health and safety needs are taken care of. As well as the built-in symbols, you can easily introduce your own logos, diagrams and schematics.

You can cut hundreds of different shapes using the symbols in the gallery, or you can import any shape you require using wmf (Windows Metafile). The CPM-100SH will also allow printing over your network.

## Consumables

Our consumables have recyclable cardboard cores and ribbons are placed in refillable cartridges, making them both environmentally friendly and cost effective. We have a large range available from stock, and can also produce specialist made-to-order materials.

**Create your own  
product & prototype labels  
wherever & whenever you need them**

## How can we help you to get the most out of your CPM-100SH?

- We offer on-site training
- Support is available by phone & email
- Software, technical data, instructional videos, clipart and the latest drivers, can all be downloaded 24/7 from our website

Yellow Polyester label set:  
100mm x 125mm. Cost: £0.74

Silver / Grey Polyester label:  
45mm x 45mm. Cost: £0.18

Tamper Void label:  
70mm x 30mm. Cost: £0.25

Low Surface Energy Polyester label:  
70mm x 18mm. Cost: £0.13

Cryogenic barcode label:  
60mm x 15mm. Cost: £0.08

Polyester safety label:  
200mm x 100mm. Cost: £1.59

## Why choose a CPM-100SH?

- ✓ On-demand custom labels
- ✓ Fast print speed - 50mm/sec
- ✓ Multi-colour & CMYK 600dpi print
- ✓ Cut labels to any shape
- ✓ Print barcodes & variable data
- ✓ Network printing capability
- ✓ Microsoft Certified software
- ✓ Extensive consumables range
