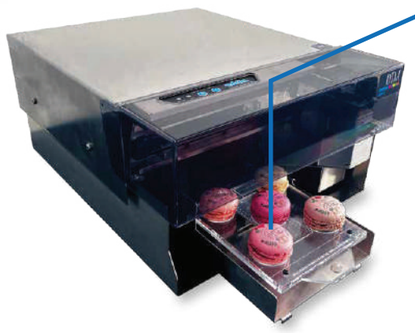
eddie™
Edible Ink Printer

Your food **colourfully printed.**

Facts about Eddie

Eddie prints full-colour photographs and text directly onto any flat and dry surface like cookies, lollipops, chocolate, wafers, marshmallows, macarons, crackers and many other suitable food items.



Feeding mechanism

Print objects can be transported to the printer either manually or automatically with the help of the carousel plate. Depending on the feeding mode, different print widths and heights result. When Eddie is used in manual mode the food needs to be placed directly on the feeding arm. Alternatively, specially made trays can be used.

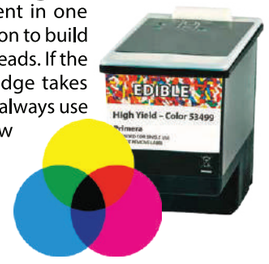
To print higher objects such as donuts, the platform kit can be installed.

Full food safety certifications

Eddie was designed to be used in food processing environments to fulfill all hygienic standards. Stainless steel housing, easy to clean components and certified ink with EU and FDA approvals make Eddie the safest direct-to-food printer in its class.

Enclosed printhead and ink cartridge

Eddie has the printhead and ink compartment in one cartridge which gives no chance during operation to build up bacteria in ink pipes or fixed installed printheads. If the ink is depleted, the insertion of a new cartridge takes seconds. With every cartridge change, you also always use a new printhead and thus literally get a new printer.



Customised DTM Trays

Trays and spacers specially developed for Eddie are available for all feeding options. These enable a wide range of objects to be printed. Customised trays can be produced on request.

Technical Specifications

Print & Object Size
Print width up to 120 mm
Item width/length max. 120 mm
Item height max. 27 mm
Item height with platform kit max. 60 mm

Print Speed
5-6 cookies per minute,
varies by size & design

Ink & Resolution
Thermal inkjet with edible ink (CMY), up to 1200 x 4800 dpi

Low operation costs

By buying an Eddie, you are investing in your future and opening doors to new business opportunities! Personalised customer orders or large orders with consistent quality are no longer a problem. To perfectly calculate how much profit you can make per decorated food item, you must of course factor in the printing costs. This is very easy with Eddie: In the integrated PrintHub status monitor you can view the printing costs for your print job at any time. Here are a few examples in advance:

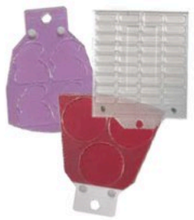
Benefits by DTM Print

Whether you buy directly from DTM Print or through one of our certified DTM Print partners, you benefit from numerous advantages.

1 Year Warranty and Swap Option

Carefree shopping!

Every Eddie purchased from DTM Print or a DTM Print partner will receive a free warranty extension and access to the exchange option for 1 year, both after product registration.



Customised Print Accessories

Endless possibilities!

DTM Print has developed safe food trays especially for Eddie, which allow you to place your food firmly in any shape and thus always achieve a centered print! Does your food have a special shape? No problem, we can also make a customised tray for you. All DTM Trays are made by hand in Germany!

DTM Manual Tray Starter Kit & € 30 Voucher

Perfect start!

We include a free tray (M0001 - 5 mm Base Grid) with every Eddie so that you can discover the benefits of the DTM Trays straight away. And if you're in the mood for more - as a thank you, we've also included a € 30 voucher for your next tray order!

Free Templates & Tutorials

A helping hand!

You will always find an answer to all your questions on our website, our YouTube channel and our social media channel. In addition to video tutorials, you can also find templates for your DTM Trays here. Simply download a template, load it into any software and you can easily align your designs!

Local Support

Goodbye language barrier!

Through DTM Print partners you have the support in many languages. So if you have a question that you can't answer yourself, there's always someone available to help. Through our partners you also have a super fast delivery time when ordering accessories!
