

The CE7000-40 comes complete with our full complement of Graphtec Software along with our NEWLY ADDED Ethernet Connectivity. Software includes Cutting Master 4 plug-in for Adobe & Corel Users and our popular Graphtec Pro Studio software for design & cut graphics. The CE7000-40 works with both PC and MAC platforms, or use the handy New USB Thumb Drive Port if needed.

MODEL : CE7000-40

Configuration : Grit-rolling Plotter Driven by a Digital Servo Motor

Maximum Cutting Width : 15"

* Guaranteed Tracking : 15" x 6.5'

Mountable Media Width : 2" to 19"

Maximum Cutting Speed : 24"/s in all directions

Cutting Force : 450 gf in 38 steps

Number of Push Rollers : 2 Rollers

ARMS System : Marks are Scanned by an Optical Sensor (ARMS 8.0), Segment Area and Multiple Marks Compensation, 4-points Axis Alignment and Auto Mark Detect

Minimum Character Size : Approx 5 mm Alphanumeric (varies depending on character font and media)

Barcode \ Data Link : YES

Off line Output Function : USB Memory - 64 Files

Alignment Accuracy : Maximum 0.3 mm with printed image (when reading specified registration marks)

Interface : Ethernet (10BASE-T/100BASE-TX) | USB 2.0 High Speed

Programmable Resolution : GP-GL™ mode: 0.1 / 0.05 / 0.025 / 0.01 mm • HP-GL®: 0.025 mm

Mechanical Resolution : 0.005 mm (5µm)

Condition Settings : 1 user settings with 8 separate conditions

External Dimensions : w 30.4" x d 11.5" x h 12.3"

Weight / with Basket : 27.7 lbs

Compatible Media : Self-adhesive Vinyl Film, Light Reflective Film (Except High-luminosity), Etching Resist and Paint Masking Film Rhinestone Media, Heat Transfer Vinyl: Flex, Flock, Image Transfer & Vinyl Print Media, Card Stock up to 350gsm

ENGINEERED FOR HIGHER PRODUCTIVITY

The **Graphtec CE7000-40** cutting plotter is the perfect solution for those looking to increase production with greater efficiency for **SIGNAGE Graphics • PRINT & CUT Graphics • Automotive Markets • Garment Decoration** and many more....

With the **USB Offline Operation** function, cutting data saved to USB flash memory can be output directly to the cutting plotter, enabling users to operate the CE7000 cutter without a computer.

Data Link Barcode System allows cutting different jobs with different data sequentially by detecting the Start Mark of each new job. By reading the Graphtec barcode, the CE7000 automatically detects its linked data from a PC or USB Drives. This function is available regardless of printer or RIP software used.

The CE7000 Series barcode data management system allows the **Continuous Cutting** of multiple jobs with different data sequentially by detecting the Start Mark of each new job.

With **Multiple Mark Compensation**, the CE7000 can significantly increase your productivity. Contour cutting is repeated for each copy, cutting production time for Print & Cut applications.

Separate tool positions for contour and die cutting ensures the longevity of your blades and cutting strip when creating decals and graphics that are effortlessly popped out of sheet and roll media.

Auto Paneling automatically splits long-length jobs into smaller pages that are cut sequentially to prevent skewing.

Barcode Scanning System

USB Offline Operation

Improved Cutting Head

Intuitive 3.7" LCD Control Panel

ARMS 8.0 NEW & IMPROVED FUNCTIONS

Advanced Registration Mark Sensing system delivers precise Print & Cut results using sensors to detect registration marks and perform axis alignment. Efficiency boosting functions improve productivity for Print & Cut applications such as labels and decals.

Expanded Contour Cutting Area expands the Print & Cut area to include objects outside of the registration marks. Production efficiency is enhanced and media waste is reduced.

Expanded Contour Cutting Area

Reversed Color Registration Marks

Middle Marks on X & Y-axis

Segment Area Compensation (X-Y)
Recognizes middle marks between the registration marks to correct X / Y-axis distortion for greater accuracy when cutting longer length media.

Reversed Color Registration Marks
With this reversed color output, sufficient contrast is created for contour cutting of preprinted ultra glossy & reflective media.
